

Series MOSES 1000

The New Pull Harvester Head for Green & Red Chili Peppers

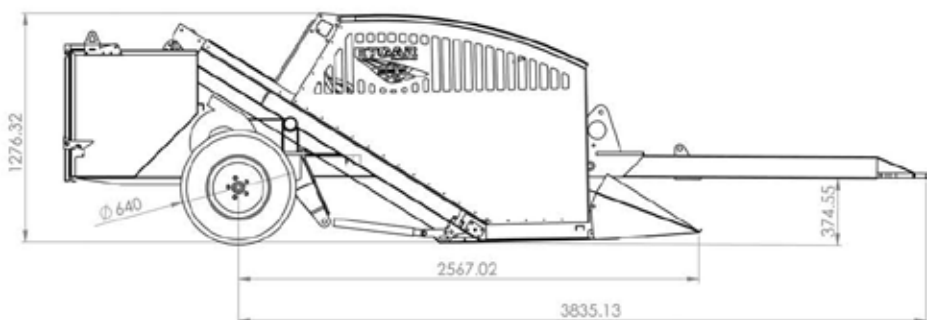

Unique pull harvester head offers high crop recovery with gentle handling

The harvester head picks green and red chili peppers with helix-shaped strippers without causing any damage to the fruit or plant and enables repeat harvesting.

Offering quick and easy operation and maintenance, the harvester head incorporates rear steering for enhanced control at a 4.5 m turning radius.

The head can conveniently fold for road transport and can be connected to a tractor eliminating the need for a costly combine.

Saves time and labor

- Fits onto all types of tractors
- Harvests both green & red chili peppers
- Picks one row at a time
- Suitable for any row width from 20" (51 cm) upward
